PROFESSIONAL SUMMARY

Data-focused technology professional with 1.5+ years of enterprise QA experience and hands-on project experience in SQL, data quality, reconciliation, Python, Excel, Power Query, and Power BI. Experienced in backend data validation, business-rule verification, API testing, discrepancy investigation, and operational reporting. Strong technical foundation across QA, application support, and web development.

TECHNICAL SKILLS

- Data & BI: SQL, PostgreSQL, Data Quality, Data Reconciliation, Data Validation, Excel, Power Query, Power BI, DAX, Pandas, Data Visualization
- Python & Automation: Python, NumPy, Pytest, Selenium WebDriver, Requests, REST API Testing, Git/GitHub
- Quality Engineering: Functional, Regression, Integration, System & UAT Testing, API Testing, SQL Validation, Test Design, Defect Tracking, Jira
- Web Development Foundations: HTML, CSS, JavaScript, React (React.js), Node.js, Express.js, MySQL
- Tools & Practices: Postman, Chrome DevTools, VS Code, Agile/Scrum, SDLC, CI/CD Concepts

PROJECTS

Banking Transaction Reconciliation & Data Quality Platform

PostgreSQL | Advanced SQL | Python | Pandas | Pytest | Excel | Power Query | Power BI | DAX

- Built an end-to-end reconciliation platform comparing transaction, ledger, and settlement data across multiple banking-style systems.
- Implemented 24 reconciliation rules, 20 data-quality checks, and 19 controlled anomaly scenarios covering missing records, duplicates, mismatches, integrity, sequencing, and timing issues.
- Developed automated exception loading, lifecycle management, audit history, and 29/29 passing Pytest tests validating reconciliation, data quality, and exception workflows.
- Created 7 PostgreSQL reporting views, a refreshable Excel dashboard, and a 3-page Power BI report for exception KPIs, aging, reconciliation trends, and DQ monitoring.
- Built synthetic banking datasets to simulate realistic reconciliation failures and validate rule coverage across end-to-end workflows.

UI & API Test Automation Framework

Python | Selenium WebDriver | Pytest | Requests | GitHub Actions

- Built reusable UI and REST API automation using Pytest, Selenium, Requests, fixtures, assertions, and structured test data.
- Added regression validation, API response checks, and CI/CD-style automated execution with GitHub Actions.

PROFESSIONAL EXPERIENCE

Technical & Customer Support Specialist (L2 Case Manager) | Teleperformance Canada | Jul 2026 - Oct 2026

- Investigated complex service cases by reviewing histories, validating information, identifying discrepancies, and determining next steps.
- Maintained structured case documentation and coordinated follow-up, escalation, and resolution across multiple active cases.

Assistant System Engineer - QA | Tata Consultancy Services (TCS) | Jul 2021 - Jan 2023

Project: Enterprise Government Insurance Platform

- Validated backend data, insurance calculations, business rules, and application transactions using SQL.
- Tested REST APIs and JSON responses using Postman; investigated discrepancies and documented expected-vs-actual results.
- Executed functional, regression, integration, system, and UAT testing and supported release validation.
- Collaborated with developers, business analysts, and QA teams through defect investigation and resolution.

CERTIFICATIONS & TRAINING

Google IT Support Professional Certificate | MTA: Introduction to Programming Using Python - Microsoft Certified, 2019

EDUCATION

- Post Graduate Diploma - Web Development | Conestoga College, Canada | Distinction | GPA: 3.80/4.0 | 2024
- Bachelor of Technology - Computer Science & Engineering | India
